

My patients always ask me...

Daniel Bourque, M.D.
OB/GYN

“If it were your wife, what would you do?” If she needed a hysterectomy, I'd want the most effective method with the quickest recovery. The da Vinci® surgical robot accomplishes that.

IT'S LIKE NIGHT AND DAY. Four tiny scars compared to the large abdominal incision. Much less pain and bleeding. Recuperation is more like two weeks instead of 6-8.

I TELL MY PATIENTS, It's like the difference between recovering from a normal delivery versus a cesarean section.
