

My patients always ask me...

Allison Taylor, M.D.
Obstetrician/Gynecologist

“If it were you, what would you do?” I’m all for solutions that involve the least amount of pain and the shortest recuperation. For my hysterectomy patients, that usually means using the da Vinci[®] Surgical Robot.

I’VE PERFORMED MANY hysterectomies with the robot, several of them complex, with terrific outcomes. Gone are the days of the large “bikini” incision.

THE DA VINCI PROVIDES a cleaner cut than a blade, causing less trauma to the patient’s tissue and less bleeding. Recovery time is cut in half.
